# THE STORY TBHL

Two Brothers Holding Ltd (TBH) is a pioneer in the steel industry and one of the oldest and largest export houses in manufacturing lifestyle stainless steel products in India. Established in 1995, TBH is an ISO 9001-2008 certified company, offering a complete line of exquisite and unique stainless steel kitchenware.

Headquartered in New Delhi, TBH boasts state-of-the-art manufacturing facilities. The company's facility at NH-1 in Samalkha (Haryana) is equipped with metal cutting, forming, designing and welding equipment, and other state-of-the-art machining capabilities available today. We procure steel direct from the mill and manufacture kitchen and tabletop stainless steel products made of high quality 18/8 and 18/10 grading sheets as also the more affordable 14/1 and 14/4 sheets.

Over the years, the company has witnessed exponential growth and has continuously reinvented itself to meet the demands of emerging trends and cosmopolitan lifestyle. TBH today boasts six international retail giants and other global names as its clients for its double wall and single wall stainless steel products.

## FORMATION OF COMPANY

TBH added another feather in its cap with the launch of a la mode, a lifestyle stainless steel brand offering a unique range of houseware, tableware, barware, and giftware articles for all lifestyles.

The brand was launched in 2006 with the objective of bringing about excellent designs & forms in stainless steel table ware & home décor products for the international market. A la mode, meaning the current fashion or style, is a beautiful blend of design with functionality. Created to enhance your lifestyle, the products lend dignity and sophistication to any gathering and ambience.

The essence of the brand is that it reflects a personality that is just you.' As a trendsetter, a la mode recognizes the changing sensibilities & aspirations of the consumers and responds to them. Today a la mode is one of the few Indian home grown brands, which signify luxury & lifestyle. In a span of couple of years, a la mode has carved a niche for itself within the lifestyle segment by becoming India's premier stainless steel home segment product manufacturer and exporter.

Through its state-of-the-art manufacturing unit in Haryana, India, a la mode produces four distinct categories of designer stainless steel products viz. home décor, bar range, dining range, and beverage range. A la mode products are made by our skilled craftsmen. Within our own studio for creative product design, a team of professionally qualified designers explore the challenging frontiers of design and create aesthetic delights in functional forms for consumers all over the world. High quality 18/8 and 18/10 sheets are then used to turn these designs into reality.

**The Brand**

A la mode is able to develop exclusive but affordable stainless steel products and accessories for people who consciously wish to express their lifestyle. The brand today represents one of the most extensive stainless steel collections for export in the international market. The individual form language of the design of each product underlines the rhythm, character and the high value of the materials used in the clear shapes and lines. The result is a collection of unique products whose timeless design fits with gentle subtlety into all manner of living worlds.

At a time when steel was synonymous with functionality and durability, a la mode successfully challenged the popular mind set and showcased that it could be used to create designer stainless steel lifestyle products. In the lifestyle arena, it is for the first time that steel has been explored to create an edge over traditional available designs, which are functional, affordable as well as designer.

A la mode reinforces the company's commitment to deliver pioneering stainless steel products and services recognized for their quality, excellence, and trustworthiness. We believe in conducting our business activities based on standards of honesty, openness, fair play, and decency.

A la mode reinforces the company's commitment to deliver pioneering stainless steel products and services recognized for their quality, excellence, and trustworthiness. We believe in conducting our business activities based on standards of honesty, openness, fair play, and decency.

We make it is easy to do business with us. Our highly experienced team of professionals operates in a work culture that emphasizes the importance of providing outstanding products and customer service. Our systems, processes and flexible policies support our goal of providing customers with a positive experience throughout the business cycle.

We understand that a deal does not end as soon as the contract is signed - it takes a lot of follow through to ensure that our customers are truly satisfied with the end products. This is why we have such a healthy relationship with our customers and can provide referrals to new customers for their peace of mind. Since our business' inception, we haven't just created beautiful steel products - we have built a strong business with a sound reputation.

We own the right manufacturing facilities and employ the right people to get the job done correctly, on time and on budget. With even the slightest bit of research on many of our competitors, you will soon see why working with us will be the best choice you can make when ordering stainless steel products for your home, restaurant, or hotel.

So, WHY SHOULDN'T YOU?!

ALAMODE WELCOMES YOU!
